

# Cao Ngoc Giap

Intern Backend Developer

📍 Son Dong - Ha Noi

✉ ngocgiap5204@gmail.com

📞 +84 359 430 937

## Summary

I am passionate about coding and improving my skills by creating full-stack projects and clones to practice and learn. I am always focused on growing my knowledge and building high-quality solutions.

## Experience

### IT Support at Hiep Thanh Computer

Son Dong - Ha Noi | Full-time

01/2025 - Present

Technical support and troubleshooting related to hardware, software, and network systems for users

- Deploying and configuring operating systems (Windows/macOS).
- Installing, configuring, and maintaining surveillance systems (IP/CCTV Cameras) and network devices (Routers, Switches, Wi-Fi APs).

### Backend Developer at FPL Factory HN

Nam Tu Liem - Ha Noi | Full-time

09/2024 - 12/2024

Built REST APIs and database systems for management platform

- Developed APIs using Spring Boot combined with JPA/Hibernate for managing data (events, articles, GPA explanation).
- Fixed bugs based on reports from the testing team or user feedback.
- Participated in team documentation and interface design.
- Worked with frontend frameworks like React to build basic user interface components.

## Projects

### Task Management API

RESTful API for project management (Event, Article, GPA Explanation)

Technologies: Java, Thymeleaf, Spring Boot, MySQL

🔒 Private repository

### Polyshoes Desktop App

Desktop application to manage sneaker products and store operations.

Technologies: Java Swing, SQL Server

🔒 [github.com/caongocgiap/polyshoes.git](https://github.com/caongocgiap/polyshoes.git)

### Landing Page Hackathon 2023

Landing Page Hackathon 2023 Semi-Finals

Technologies: HTML/CSS
